

DATA LEADERSHIP SUPPORT

Bailey Education Group's coaches work with teachers and leaders to:

- Utilize district assessment and data management platforms to identify trends and gaps in student learning and determine instructional focus
- Assess platform support, including supporting data, retrieving data, and analyzing data
- Assess understanding of the platform's data reports to skillfully inform instructional practices, identifying trends and gaps in student achievement, including gaps in subgroup performance
- Build teacher and administrator capacity in using the district data management system to engage in data mining, report publishing and data publishing
- Support teachers and administrators in explaining data and engaging in both face-to-face and virtual data conferences with students and families to advance transformation goals
